

The American Presbyterian Church

COR. DORCHESTER & DRUMMOND STS.

Ministers:

RICHARD ROBERTS, D.D.
ALEX KERR, B.D.

Public Worship at 11 a.m. and 7.30 p.m.
Dr. Roberts will preach at both services. In the evening he will continue the course of sermons on—

THE REALIZATION OF LIFE

Nov. 12th—Yesterday and To-morrow.

Organist and Choir Director: Mr. W. H. Thorley.

At 3 p.m. the Young Men's Bible Class meets in the Church.
Mr. P. A. Doig, leader. Mr. G. W. Birks, teacher.

At 5.15 p.m. a "Social" for young people is held in the Church Parlours. Tea will be served. All young people are cordially invited.

At 7 p.m. The Musical Prelude, Mr. W. H. Thorley at the organ. Mr. W. A. Coates, leader of mass singing.

To any or all of these Services, McGill men are cordially invited.

ADMIRAL SIMS IS MADE DOCTOR OF LAWS BEFORE HUGE STUDENT AUDIENCE

Special Convocation Held Yesterday Afternoon in the Royal Victoria College Was Largely Attended—Musical Programme Supplied by Glee Club and Mandolin Club—Guest of Honour Was Taken to Ceremony in Gaily-Decorated Vehicle Drawn by McGill Men—Remarkable Reception Accorded American Visitor's Speech.

Never before has McGill bestowed an honorary degree upon a distinguished visitor amid such scenes of widespread enthusiasm as were exhibited last evening when, at a special convocation, Admiral William Sowden Sims, G.C.M.G., U.S.N., was presented with the honorary degree of LL.D. The Convocation Hall of the Royal Victoria College was packed to overflowing. The student body had turned out almost to a man, and an enthusiastic audience of undergraduates filled the centre block of seats, and overflowed into the standing-room at the back and along all the aisles at the sides, while crowded groups were huddled in the niches of the windows, and others, more unfortunate, found it impossible to gain admittance to the hall, and were forced to be contented with vague echoes and a fleeting glimpse of Admiral Sims as he entered and left the room. Dragged in triumphal procession through the adjacent streets, the carriage of Admiral Sims and Sir Arthur Currie arrived at the steps of Royal Victoria College shortly after four-thirty where the admiral was given an ovation such as has been granted to few.

The scene in Convocation Hall was an impressive one. As the professorial procession made its appearance, the assembly rose and remained standing until the faculty had taken their seats upon the platform. Led by the deans of the faculties and followed by the professors robed in the caps and gowns of their respective universities, the cortege solemnly made its way through the hall. Admiral Sims, the Principal, the Vice-Principal, and the Registrar followed, and ascended the dais. Then, all remaining standing, Dr. E. I. Rexford, Dean of the Affiliated Theological Colleges, offered up a short prayer in which he called down a blessing upon all institutions of learning seeking for the light of knowledge and truth. The feeling that McGill is such an institution seemed to find expression in the rendering that then followed of "Hail, Alma Mater."

As the last notes of the old college hymn died away, the Vice-Principal, Dean Adams, of the Faculty of Applied Science, rose to make the presentation of "Admiral William Sowden Sims, G.C.M.G., Grand Officer Legion of Honour (France), etc., LL.D., Sc.D., for the Honorary Degree of Doctor of Laws." It would take too long, said the Vice-Principal, to explain all the many reasons for which this degree was mentioned. In the first place, Admiral Sims was a distinguished naval gentleman with a brilliant career behind him. Graduating from the U.S. Naval College, he rose to the highest rank attainable, and commanded the American Naval forces in the recent war. In the second place, in the person of Admiral Sims, a notable diplomat was being honoured, and one who has served with distinction as Naval Attaché at Paris, St. Petersburg, and in the East. Finally, Admiral Sims was honoured as a gentleman of academic distinction, being a professor at, and the president of, the American Naval College. "But it is also for his personal qualities," continued Dean Adams, amid applause, "that we in Canada are pleased to honour Admiral Sims. He has done perhaps as much as any other single individual to promote feelings of friendship between the United States and Great Britain, and has been an outspoken advocate of England at times when perhaps it would have been to his own interest to remain silent." The Vice-Principal's introductory address was interrupted by frequent outbursts of applause, the mention of the personality of the American Admiral, of his efforts to promote Anglo-American friendship,

and of the fact that he is by birth a Canadian, all being received with especial enthusiasm.

The Honorary Degree of Doctor of Laws was then conferred upon Admiral Sims by the Principal, Sir Arthur Currie.

After the signing of the records, the McGill University Glee Club gave its first public performance of the present session, and won well merited applause for the fine rendering of two much-appreciated songs.

As the slender figure of McGill's new Doctor of Laws rose to take the address that is customary under the circumstances, a leather-lunged cheer-leader at the front of the hall leapt to his feet.

"What's the matter with Admiral Sims?" he yelled.

And back came the answer in a stentorian shout, the like of which the venerable walls of Convocation Hall have not heard for many a long day: "He's all right"—and so on, down the time-honoured formula ending in a good old McGill yell.

In opening his address, Admiral Sims stated that he was unable to give adequate expression to the depth of his feeling at the honour that had been conferred upon him, and at the reception that had been tendered to him. He had had no good luck in speech-making, declared the Admiral amid laughter and applause, and had been officially so informed on several occasions. It was with a feeling of something akin to pride that he was the recipient of honours from the leading university of the land where he was born. McGill, said Admiral Sims, is the oldest university in Canada, and one of the most distinguished in America, and is known for the brilliant type of scientific men which it has given to the world, and of whom Sir Ernest Rutherford and Professor Frederick Soddy are such shining examples. The speaker then paid a great tribute to Sir Arthur Currie. He was great before the war, declared Admiral Sims, he was great during the war, and now, in his work at McGill he is great after the war.

"But coming to the subject of my address, it is to you young men that I wish to speak," said the Admiral, "it's no good talking to the old people, for they won't listen." And then, in what followed, Admiral Sims told some stories of the school life of his youth and some incidents of his naval career and drew from them the moral of the absolute necessity of loyalty and initiative. The golden rule for the development of initiative is this: Practice it all the time in the little things of every day and its development will be found to have consummated when the big task is at hand.

"Above all, boys," declared the speaker, "don't ask anybody how to do anything. Sit down and think it

out, then go and try it—and don't be afraid to use your brain."

The other great virtue extolled by Admiral Sims was that of loyalty. It is easy enough, he stated, to be loyal to a man you like, but it is a more difficult thing when the man in authority is an overbearing, pompous, or distasteful person. Loyalty, however, is impersonal, it is to the ship not to the captain.

In conclusion, Admiral Sims again expressed his deep sense of the honour that had been vouchsafed to him, and which was made manifest as much by the warm welcome which he had received from the student body as by the degree which had been conferred upon him by the faculty.

After long and hearty applause and loud cheers the audience, assisted by the Glee Club and the orchestra of the Mandolin Club, joined in singing the "Star Spangled Banner" and, after the Benediction had been pronounced by Dr. Rexford, in "God Save the King." Prior to the Convocation, lectures having been discontinued shortly before four o'clock, in order not to conflict with the momentous occasion, well over a thousand students eagerly assembled in front of the Union, extremely keen to participate in the monster parade that was to convey the University's distinguished guest at the R.V.C. The crowd was of such magnitude and so strongly advertised its earnestness to be in motion, that it seriously impeded passing traffic. The leaders, to curb the jostling and the impatient chaffing of the huge throng, quickly swung the fellows into line.

A carriage, appropriately bedecked and emblazoned with national insignias, had been procured. Long, stout ropes were attached, and over a score of suitably apparelled McGill men took the place of the customary horses.

The College band, prepared to do its noblest, appeared and took its stand in advance of the vehicle.

Then commands were shouted, the ropes seized, music blazed out, and the procession was under way. Late comers greatly augmented the ranks until the parade swelled into one of the largest street celebrations ever staged by McGill undergraduates. With small exaggeration, if a straight course had been allowed, the destination, Sir Arthur Currie's residence, would almost have been reached before the vanguard passed the McCord Museum.

The leaders parted the fellows into widely separated files. Traffic was hopelessly confused, nor given the slightest chance to disentangle itself.

Jeff Harding and Nutting, yell leaders, ably aided by Hamilton, provoked the crowd into roaring the old yells, and frequently the "Hail." But above all, most pleasure was found in waging the fascinating outdoor pastime of "Beaver." Everybody had the habit—it was contagious—and the result was numberless games being contested throughout the whole length of the parade.

Many of Montreal's staid, venerable patriarchs found themselves centres of attraction. Bill Brewer and Cecil Hay, ornately adorned with sweaters of red and white, led the procession from Sherbrooke to St. Catherine, by way of Drummond Street. Traffic was completely paralyzed, not a vehicle proceeding in the invaded district. Then again they advanced to Sherbrooke, where a halt was made before the home of the Principal.

Admiral Sims and Sir Arthur Currie shortly appeared amid loud applause, and entering the carriage, were joyously pulled through the saluting files that seemed ever ready to inform those caring to know that the gang was all there, every one of them.

The Cigarette with the original flavor

ARMISTICE DAY

The attention of students and members of the staff is called to the Royal Proclamation that silence is to be observed for two minutes at 11 a.m. today in memory of those who fell in the Great War.

Those who are having lectures from 10 a.m. to 11 a.m. are requested to remain in their class-rooms till the hour mentioned instead of leaving as is usual at 10.55 a.m.

J. A. NICHOLSON,
Registrar.

PHOTO FRAMES in Sterling Silver

AMONG all the articles most suitable for Christmas gifts, none is likely to be quite as highly prized as a carefully chosen photo frame.

Sterling Silver frames are especially desirable, because they may be engraved with name or initials to match those on toilet articles.

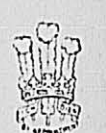

If you are in doubt as to what to choose for the one you are particularly anxious to please on Christmas morning, let your choice be a Sterling Silver photo frame.

We have them in many sizes, styles and prices—you will be sure to find one to your taste.

May we remind you of the very attractive Christmas Greeting Cards you will find in our Stationery Department.

ANNUAL BOARD WILL HANDLE ADVERTISING

Committee Was Appointed Yesterday.

BIOGRAPHY FORMS

Essential That Pictures Be Completed Next Week

Further progress was made on the 1924 Annual at a meeting held yesterday afternoon, well attended in spite of the Convocation going on at the same time. The novel advertising scheme which has been under discussion, was definitely adopted by the Board, a committee composed of J. M. Packham, Editor-in-Chief; L. C. Tombs, Associate Editor; F. T. Collins, B.A., Business Manager; G. T. Lafleur, Arts Representative, and F. L. Windsor, Commerce Representative; Miss Carol Robertson, Recording Secretary, and Miss Phyllis Murray, R.V.C. Representative. Already, two members of the Board have solicited \$250 advertising quite easily. Voluntary advertising will save the Board several hundred dollars.

The Board regretted very much that owing to lack of time, H. Batshaw, Law '24, Photograph Editor, found it necessary to resign. R. W. N. Burroughs, Science '24, being elected to take his place. Presidents of classes, clubs, societies, and other organizations are urged to get in touch immediately with Burroughs at St. Louis 5096, to arrange for pictures. Charges will be made the various classes, clubs, societies, etc, for having their group pictures in the Annual as is customary in the yearly publications of Canadian and American Universities. The following tariff was decided upon: Class pictures, containing 50 or less students, \$5; over 50 students, \$7; Council, Union House Committee, and "Daily," \$10; departmental clubs as the Economics Club, Chemical Society, etc., \$5; athletic organizations, \$5; Departments of Pharmacy, and Architecture, and Schools of Physical Education and Graduate Nurses, \$15; Fraternities (only crests), \$10.

The biography forms were distributed to the representatives of the junior years on the Annual Board, and will be immediately given out. Juniors are especially requested to follow out faithfully the printed instructions on the cards. Biographies, as well as pictures, must all be complete by November 20th; failure to comply with this ruling will keep those late out of the Annual. It is absolutely essential that full co-operation be given the Board. Biographies should be given to the class representatives on the Board following completion, who will

OWEN TAYLOR LAID TO REST YESTERDAY

Large Representation From Medical Faculty

LONG CORTEGE

Last Tribute Paid to Popular Student by Classmates

A fitting and inspiring service in the Church of St. John the Evangelist marked the last tribute to McGill to the late Eric Owen Taylor, Med. '24, who died on Tuesday, in the Royal Victoria Hospital, after a short illness. The church was filled almost to capacity by the professors, students and friends, who keenly felt the loss of one who, for several years has filled the role of fellow-student and comrade. The brief Anglican funeral service was taken by Rev. W. H. Davison, rector of St. John's, assisted by Rev. Dr. E. I. Rexford, principal of the Diocesan College, where Taylor made his residence while at McGill; Rev. Claud Silk, of Med. '26, and Rev. H. C. Cox, M.C. S. L. Harris, Med. '24, presided at the organ, and played the two hymns and other musical parts of the service, with a deep sense of reverence and feeling, which will long be remembered by those present, and especially so being a classmate.

The ushers and pall-bearers were taken from the same year in Medicine.

The half holiday granted by the Medical Faculty afforded an opportunity for all Medical men to pay their final respects. Shortly after ten o'clock the members of Med. '24 assembled at the University and marched in a body to the church, where they occupied a portion of the seats in the left centre aisle. By 10.30 o'clock a large and representative congregation had assembled, including Dr. Geo. E. Armstrong, Dean of the Medical Faculty; Drs. H. S. Birckett and F. G. Finley, former Deans of the Medical Faculty; Dr. A. F. Ruttan; Dr. F. A. C. Scrimger, V.C.; Dr. D. S. Lewis; Dr. A. D. Campbell; Dr. H. M. Hardisty, D.S.O., M.C.; Prof. J. C. Simpson, and representatives of other faculties at McGill.

At a few minutes after 11 o'clock the long cortege, nearly two blocks in length, followed the procession to the Mount Royal Cemetery, where the graveside rites were conducted by Rev. C. W. Silk. As the students circled around the resting place the shrill notes of the last post echoed throughout the mountain cemetery, and many were the expressions of restrained emotions.

Among the friends in attendance were: Mrs. Hides, Miss Hazel Rexford, Miss Marjorie MacDonald, Mrs. P. Wright,

(Continued on Page Two)

RUGBY RESULTS

Arrangements have been completed for the posting and announcement in the Union this afternoon of the scores by quarters of the McGill-Syracuse game, as also that being played between 'Varsity and Queens in Kingston. The first wires should be in by two-forty-five o'clock.

WHAT'S ON

TODAY

2.30—McGill vs. Syracuse.
2.30—Inter-Theolog soccer.
3.00—Bulletins from Syracuse.
5.15—Water Polo at Central "Y".
6.00—Baseball: Sci. '26 vs. Arts '25.

COMING

Nov. 13—S.C.A. Convention Committee at Strathcona Hall.
Nov. 14—Water Polo: M.S.C. vs. McGill Seniors at Y.M.C.A.
Nov. 14—Water Polo: Maisonneuve vs. McGill Intermediates at Y.M.C.A.
Nov. 14th—Professors Chess Matches.
Nov. 14—Old Scouts Club at Strathcona Hall.
Nov. 14—Annual Board in Union.
Nov. 14—Interclass debating: Arts '26 vs. Commerce '25.
Nov. 16th—Western Club.
Nov. 17—Montreal Graduates High School Dance.
Nov. 18—R.V.C. Thé Dansant.
Nov. 22nd—Frosh-Soph. Medical Banquet.
Nov. 24th—Junior Prom.

MONTREAL, SATURDAY, NOVEMBER 11, 1922

ANGLO-AMERICAN AMITY

The spontaneous reception accorded McGill's distinguished visitor yesterday by the university authorities and the study body was not only high tribute to an eminent man, Admiral Sims, but to a great nation, the United States of America. November the tenth, 1922, will remain one of our most memorable days, and we trust that the Admiral will carry home with him happy thoughts of his first, and we sincerely hope by no means his last, visit to McGill. In parade and Convocation, Admiral Sims showed the same unreserved, hearty, friendly, almost boyish spirit.

Born in Canada, the son of a Canadian mother, and of an American father, Admiral Sims has been a true friend to the British Empire. Before, during and since the war both in the practical sense as a naval commander and in the more delicate capacity of diplomat, he has done perhaps more than any other American to bind closer together those ties of kinship existing between the two Anglo-Saxon peoples, the only hope for world peace.

The bestowal of an honorary degree on this famous sailor, and the playing of an international Rugby game between McGill and Syracuse, may appear at first sight to have little in common, but in reality they are both fulfilling the same noble purpose. Whether we win or lose across the border this afternoon, we are contributing our small part to the further development of Anglo-American amity. At the same time as McGill students are bidding their sailor guest not adieu, but au revoir, we are hoping for victory on the gridiron. More distinguished American visitors and more international athletic events would be thoroughly welcomed by McGill. The great success of yesterday's reception was largely due to the splendid co-operation between the Students' Council and the university authorities, which it is hoped will animate all future functions.

NOBEL PRIZE AWARDED

The University staff and the undergraduate body are exceedingly pleased to learn that a former demonstrator of this institution namely, Professor Soddy, now professor of Inorganic and Physical Chemistry at Oxford, has been awarded the Nobel Prize in chemistry for 1922.

NOTICES

BASEBALL PRACTISES.

Until further notice all baseball practice hours in Molson Hall are cancelled. Notice will be given in the "Daily" when these hours will be available again. Men of the freshman and sophomore years who need attendance will be obliged to take the regular gym. class or to engage in some other line of activity to fill out their required number of gym attendances, until such time as they will be able to obtain their regular practise hour again.

LOST.

Fountain pen lost, either in the Electrical Drafting Room or Common Room of the Engineering Building. Please leave with Janitor.

CHESS CLUB.

The Professors' Chess matches that have been arranged by the Chess Club will take place on Tuesday, Nov. 14th, at 8 p.m., in the Lounge Room of the Union.

COMMERCE RUGBY.

All Commerce rugby players having sweaters, socks, or shoulder pads, are asked to hand the same to the janitor of the Arts Building.

TRACK AND HARRIER TEAMS.

The Track and Harrier teams are reminded that the date set for their pictures to be taken at Notman's is next Wednesday at 5 p.m.

LOST.

At the Stadium last Saturday, a gold signet ring bearing a crest. Finder please phone Plat. 12691.

SCIENCE UNDERGRAD. SOCIETY.

There will be a meeting of the executive of the Science Undergraduates Society on Monday, Nov. 13, at 5.00 p.m., in Room 33 of the Engineering Building.

LOST.

A Duncan & Starling Physics text book, also a note book. Name is on both. Finder please leave same with Janitor, Engineering Building.

EXECUTIVES.

Class, club and society executives have failed to hand in to the Students' Council the lists of officers with addresses last Saturday. The attention of the presidents and secretaries of the various college organizations is called to this oversight. The Council desires to have these lists at once, as they are exceedingly important.

WESTERNERS.

There will be a meeting of the Western Club Nov. 16th, in Strathcona Hall at 8.15 p.m. All men from west of Ontario are urged to come and get better acquainted. Election of officers and discussion of the club's activities for the coming winter will be the main business of the meeting.

MED. BANQUET.

The Frosh-Soph. Medical banquet will be held on the night of Wednesday, Nov. 22, at the Venetian Gardens. A list of Sophs. eligible to attend will be posted within a week in the New Medical Building. It is estimated that about 160 will attend.

LOST.

Will the person who took a seven ring leather note book, containing mathematics notes, from the top of locker No. 47 in the Arts Building at 9.50 a.m. Friday, please leave same with Janitor. If he intends to retain the book he might be good enough to mail the used pages to A. L. Turner, Physics Building.

ARTS '23.

Every man in the class is asked to pay the class tax of 50 cents to McIntyre, Mossman, or Puddicombe.

LOST.

Wrist watch. Finder please leave with Janitor of Physics Bldg., and be rewarded.

FOUND.

A bunch of keys and two triangles have been found in the Union, and may be secured by the owners on application to the Hall Porter.

BASEBALL REPRESENTATIVES

Baseball representatives of the Freshman and Sophomore Years who have not kept their attendance lists up-to-date for the practices are asked to attend to this immediately following each practice. It will not be possible to grant these attendances unless they are promptly turned in to the Department of Physical Education.

RHODES SCHOLARSHIP FOR 1923.

A Rhodes scholar for the Province of Quebec to go into residence at Oxford in October, 1923, will be selected towards the end of November next, and applications must be in the hands of the Secretary before November 11th, 1922.

Information and forms of application may be obtained at the Registrar's office or from the Secretary of the Committee of Selection, Mr. Gilbert S. Stairs, K.C., Royal Trust Chambers, 107 St. James street.

C.O.T.C. PARADE REGULATIONS.

Attention is called to necessary number of parade hours that members of

The Corps must put in:

Trained men, 25 parade hours;
Recruits, 40 parade hours.
It is not compulsory that members attend all parades so long as the required number of drills are put in during the Session.

A. I. OLMSTED,
Lieut. for the Adjutant.

FOUNTAIN PEN LOST.

Left, in Room 5, Arts Building, Wednesday morning, at 9 o'clock, after English lecture. Finder please return to Janitor.

SCIENCE '26.

At a class meeting of Science '26, held in Room 33 of the Engineering Building, it was moved and seconded that the sum of fifty cents be given by every first year man toward the class fund. Absent members please take note that this sum will be accepted by the treasurer, F. Ruthertford on or before Nov. 15.

LOST.

Library Physics Book, "Duncan & Starling," in Second Year Drafting Room, Engineering Building. Finder please leave with "Harry."

LOST.

Lost, a pair of grey gloves around the Campus this afternoon. Will finder kindly return them to the Janitor of the Arts Building.

FOUND.

A fountain pen, gold band, found in Arts Building. Owner apply to the Janitor.

FOUND.

Muffler, in Arts Building. Apply to Janitor.

FOUND.

A jack knife was found in front of the Chemistry Building. Owner may have same on application to Janitor of Physics Building.

LOST.

Black note book, bearing name of H. B. Curtis, with 4th year Medicine notes. Finder please return to porter at the Union.

FOUND.

In Molson Hall, 1 knitted scarf. Owner can have same by applying to Secretary's Office, Department of Physical Education.

VACCINATION.

According to the records in the Department of Physical Education, some students entering McGill this year have not been vaccinated. The City regulations call for vaccination for all students; will those students who have no record on their cards please attend to this matter without further delay.

LOST.

Lost—Leather note book in toilet downstairs of Union Towers, 1.30 p.m. Please return to porter.

NOTICE.

The Annual Board have arranged for the 1st year Commerce to have class photos taken at 1.00 p.m. Monday; 3rd year at 12.00 on Monday.

A CORRECTION.

In yesterday's Daily it was announced that the McGill Dance Orchestra would play at the Junior Dance. This should have read the University Dance Orchestra.

ARTS '24 BASKETBALL.

Arts '24 basketball team will practice in Molson Hall from 12—1 o'clock to-day.

NOTICE.

As already announced in the various French classes, to-night a special benefit performance of "Coeur de Moineau" is being given at the Theatre des Nouveautés in aid of the Poppy Flnd Campaign. Sections of the theatre are being reserved for McGill students. Those who have not already procured their tickets can purchase them from E. C. Amaron, Arts '23.

LOST.

Ring of keys—key of New Medical Building locker and microscope. Keys lost during the parade. Kindly leave with Crawford at New Medical Building, or phone Plateau 4339.

LOST.

A large brown envelope containing 11 part songs belonging to the McGill Glee Club. This music was inadvertently left on a chair in the Reading Room at Strathcona Hall on Thanksgiving Day. Will the finder kindly leave same with the Janitor at the Hall or communicate with A. H. Papin, Plateau 3591.

BASKETBALLERS, ATTENTION!

All students of senior years who desire to take part in basketball next week must observe the rule concerning medical examinations before taking part in competitive athletics.

Dr. Harvey is at Molson Hall every day except Saturday from 12.30 to 1.30.

FOUND.

A pair of gloves were found at Convocation yesterday and may be had on application to the porter at the Union.

CLASS EXECUTIVE, ARTS '26.

President—H. P. Teakle, 4063 Dorchester St. W. Westmount 2842.
Vice-Pres.—F. Goring, 11 Souvenir Avenue. Uptown 6.
Secretary—M. Doushkees, 4023 Dorchester St. W. Westmount 2138.
Treasurer—G. Gorrie, 2111 Park Ave. St. Louis 8454.
Scribe—T. H. Harris, 2678 Park

ANNUAL BOARD WILL HANDLE ADVERTISING

(Continued from Page 1.)

J. K. MacDonald, Mr. and Mrs. H. E. MacDonald, Mrs. S. Reid, Mrs. Hillhouse, R. L. Hamilton, president of the Students' Council.

The floral tributes included those of Miss Marjorie MacDonald, Dr. and Mrs. P. Wright, Students' Council, McGill University; Medical Undergraduates; Medicine '27; Medicine '25; Medicine '24; Mr and Mrs. H. E. MacDonald.

OWEN TAYLOR LAID TO REST YESTERDAY

CORRESPONDENCE

McGill University,
Montreal, P. Q.,
Nov. 10, 1922.

The Editor,
McGill Daily:

The Daily is not responsible for the sentiments of letters published in the correspondence columns. Signed communications from graduates, undergraduates and members of the faculties will be placed in print if they are not of too great length.

Correspondents are requested to observe the unwritten law of the newspaper office—that they write upon ONE SIDE of the paper ONLY.

Central Y.M.C.A.
Montreal,
10th November, 1922.

The Editor,
McGill Daily:

Sir,—Allow me to express my views upon a subject concerning which many students feel as I do.

The public of Montreal for the past few weeks has been an onlooker upon a journalistic drama, the outcome and the details of which have certainly reflected no credit upon that institution, the Press. I am sure, sir, that you know to what I refer, and I am equally sure that you would indignantly repudiate the suggestion that the "McGill Daily" is drifting into the class of which the weekly newspaper involved in the above-mentioned drama is a member. And yet that is exactly the way it appears to a number of critical eyes. I refer, sir, to the column entitled "Quips." The comparison between this column and a similar column which appears in the aforesaid weekly paper is close, so close, in fact, as inevitably to attract unfavorable comment. For, as an example of inanity, especially bad taste, and downright scurrilousness, "Quips" can only be classed with "yellow" journalism. Why must the actions of the students of McGill be pried into and publicly exposed, to the accompaniment of tactless comment, and sometimes slanderous innuendoes? If the said actions really bear looking into, let it be done openly and above-board, by an authorized body, and not by an agency which can never do good, but which will surely foster malice and create distrust. Doubtless "Quips" is interesting to those sordid-minded individuals who delight in hearing of the indiscretions of others, but to those interested in minding their own business it serves merely to offend.

I am, Sir,

Yours truly,

WM. L. ROBERTSON,

Arts '24.

(Editor's Note.—The above writer is rather hasty in his judgments. He assumes that the letter referred to was inserted in yesterday's issue due to a mistake on the part of the staff or editor. Quite on the contrary, it was published as an item of news that might interest the readers of the Daily as placing before them the impression that McGill had made upon a new lecturer who had come here from the United States. It was copied from the "Florida Alligator," in which paper it had received its publicity. On re-reading this letter and the

(Continued on Page Three)

The World Is Working for You

THE manufacturer who makes your shoes is working for you. So is the store that sells you shoes, your grocer, your clothier, and every concern or person who makes or sells anything you buy.

Often these people have messages for you. They want to tell you about new goods, new styles, new prices or other new things they think you should know about.

They can't speak to you personally, because they have so many customers to serve. So they put their messages in the newspaper in the form of advertisements.

It is to your interest to read the advertisements. They are published for your benefit. They keep you informed as to what these folks are doing for you. They help you buy the right goods at the right time and to make the most of your money.

Moreover, you'll find that business concerns that tell you frankly what they are doing are the most dependable. Stores that advertise are progressive stores that have something real to say to you. Manufacturers who advertise their products have confidence in them, because it does not pay to advertise anything that is not good.

Reading advertisements is both
interesting and profitable.

RUGGERS TODAY ON THE CAMPUS

Meet Montreal Club Fifteen This Afternoon

This afternoon, at 2.30, the McGill English Rugby team will meet the Montreal fifteen in the return match to that played two weeks ago on the old Campus, when the Montrealers were victorious by the score of eight to nil. This time the Red and White players are confident of being the victors, and the added experience gained in practices and in last Saturday's match since their last meeting with Montreal, should make them considerably more effective a team than they were.

As well as the game between the Senior fifteens of both clubs, there will be played, immediately after this game, a match between the second teams. Both matches will take place at the Stadium, the first to commence at two-thirty.

The men who will represent McGill follow:

"A" Team. "B" Team.

Full Back. G. A. McAvity

Three-quarter Backs.

H. Marpole. R. E. Legg

H. C. D. Cooper. A. N. Other

J. L. MacNamee. F. M. Eve

E. M. O'Brien. E. Graydonald

D. D. McGowan. W. H. Laidlow

A. J. Taylor. H. Campbell

Team to be at Stadium at 2.15.

MEXICAN COLLEGES

"Every student interested in the study of Mexico should find time, during some part of his college life, to attend a session in a Mexican college," says Miss LeLaine West, who has just returned from attending the summer session of work given by the University of Mexico. "I cannot emphasize too much the good which comes from such contact with Mexican students and customs."

Mexican universities are very different from ours, according to Miss West. There is no campus, the buildings being located in the midst of business blocks. College atmosphere is entirely lacking. Women do not attend classes during the regular school year which is eleven months long. Men are the only students and it is customary for them to take their degree in law, although often they do not practice it afterwards. In Mexican colleges, class work is foremost and owing to the long college year, many students take their degrees at the age of nineteen years.

The first summer session was held in 1921 and at the second course given this year five hundred students from the United States were present. This number was composed mostly of teachers. The courses would have been even more profitable than they were, in the opinion of Miss West, had they been better organized. Very little forethought was given to the management of the classes.

The lectures themselves are very similar to ours. A course, especially interesting to all of the students, was the series of lectures on archaeology given by Professor Mena, a prominent archaeologist. Another was a course in Spanish novel given by Gamboa, foremost Mexican novelist. Only Spanish was spoken in the classes.

"The faculty was wonderful to us," said Miss West. "They took us on excursions through the old convents and churches and to the Pyramids in Quetzalcoatl. The Pyramid of the Sun is now entirely excavated, but the Pyramid of the Moon is still covered with shrubs. The faculty also gave a formal reception for the students, who in turn entertained the faculty with a formal ball at Sanborn's ball room."

"If an American does not get along in Mexico, it is his own fault. The people are sympathetic and realize what our recognition and co-operation means to their country."

There is no middle class in Mexico—only the highly educated class and the great mass of illiterates. The biggest problem is that of the uneducated, unsanitary Indians who comprise a large part of the population.

Miss West said that the national game is pelota, which became very popular with the American students. It is similar to our game of handball, except that all action is done with a basket fastened on the right arm.

"The toddle is still popular in Mexico and 'The Sheik' is still heard everywhere."

Forty men from Georgetown University attended the summer course and Professor Russell brought sixty men from the University of Utah. Those from the University of Oregon were Miss Anna M. Thompson, of the Spanish department, Miss LeLaine West, and Donald McDonald, Oregon Daily Emerald.)

START BASKETBALL SEASON ON MONDAY

Schedule of the Interfaculty Games Drawn Up

The following is the schedule for the first round of the Inter-class Basketball League:—

Monday, Nov. 13.

5-6—Arts '23 vs. Commerce '24.

6-7—Med. '24 vs. Dent. '24.

7-8—Commerce '25 vs. Dent. '25.

Wednesday, Nov. 15.

5-6—Arts '24 vs. Science '24.

6-7—Med. '26 vs. Med. '26.

7-8—Commerce '25 vs. Dent. '25.

Friday, Nov. 17.

5-6—Arts '25 vs. Science '23.

6-7—Arts '26 vs. Med. '25.

7-8—Science '26 vs. Commerce '23.

The complete schedule will be posted in Molson's Hall on Monday. Teams must be ready to start at the hour named.

Men who have not been examined this year should appear before Dr. Harvie between 12.30 and 1.30 some day before a game. No players will be allowed to start who have not fulfilled the requirements of the Department of Physical Education.

The following practice hours will be available for next week, and may be arranged for on application to Van Wagner.

Monday: 1 to 2.

Tuesday: 1 to 2; 2 to 3; 7 to 8.

Thursday: 2 to 3; 4 to 5; 7 to 8.

Friday: 1 to 2.

Saturday: 1 to 2; 2 to 3.

ADRIFF ON MAIN STREET

In a small mid-western town I once saw a safe dependable family horse left alone on Main street with no hand on the reins. At first he began to walk, then to run, and in a few minutes had endangered many lives, smashed the carriage to pieces, and so injured himself that he had to be shot. Liberty is like fire; under wise control an incalculable blessing; uncontrolled, an appalling agent of destruction. In this case sudden freedom from accustomed control, with no preparation for its proper use, brought a useful career to a speedy and disastrous close. Liberty to the unprepared is always intoxication, often fatal.

Every year a hundred thousand boys are suddenly "turned loose" on the swarming Main Street of American college life. Most of them have never taken a step without feeling the pressure of the reins. In the "well-managed" home the careful parents get the boy out of bed, see that he is properly dressed, send him to school on time, control his visits downtown or to the picture show, make him study every night, and see to it that he doesn't omit church or Sunday school.

In the boarding school, especially of the military type, the pressure of the reins is even more constant and compelling. Every waking hour is governed, every act under compulsion. The more nearly the individual becomes passive cogs on the wheels of a resistless and smooth-running machine, the more perfect the "training" is supposed to be.

Meanwhile, to save trouble and protect themselves from criticism, the colleges insist on the fiction that these unprepared products of such a system are "college men" and in nine cases out of ten do not even profess to hold the reins.

It is no wonder, therefore, that when these hundred thousand young colts find themselves this September "turned loose on Main Street" many will run wild, smash their college course to smithereens, and be "shot" by the college authorities or by the homefolks before the first year of their great adventure is over.

Incredible as it may seem, most colleges are proud of their failures, and point to their piles of corpses as evidence of their "high standards." That each represents a wrecked college career and a sorrowing home seems never to occur to them. It is very hard and very troublesome to train such raw colts to a proper use of freedom. It is so much easier and such an armor against criticism to lay the responsibility entirely on the colts, shoot the runaways by the score, and call the whole murderous process a useful, necessary, and providential elimination of the unfit.

So the slaughter of the innocents goes steadily on, the schools holding the reins tighter, and the colleges abandoning them more completely, with every passing year, with such disastrous effect that of the hundred thousand hopeful aspirants who begin their college training this September less than half will survive their sophomore year.

The boy preparing for College cannot reform these unreasonable methods, but he can, if he has enough brains and backbone, recognize the danger and keep himself out of the college graveyard.—Temple University Weekly.

Cub—"Hurrah! Five dollars for my latest story!"

Herb—"Who from?"

Cub—"The Express Company. They lost it."

PRESIDENT EXPRESSES THANKS TO STUDENTS

The Students' Council wishes to thank all the men that participated in making the Convocation such a success.

R. L. HAMILTON.

THEOLOGS PLAY TO ANOTHER TIE

Fast Soccer Displayed in Early Morning Game

Early this morning two opposing soccer teams from the Congregational and Presbyterian Colleges trotted forth on to the frozen ground of the old Campus, and when some forty minutes later the final whistle sounded these ancient rivals had chalked up another tie game, with the score standing at 1-1. The game was fast and thrilling from start to finish, and the frosty early morning air seemed to lend an added energy to the players, who strove with might and main to break the everlasting tie that seems to have characterized the inter-theological college soccer this fall.

Neither side scored in the first half, though it is only fair to say that the P. C. pressed their opponents hard, and nearly scored on some few occasions. Good work by Somerville, in goal for the C. C., saved the bacon for his side, and the Congo, backs generally managed to clear the ball out when it came into close proximity to their goal. At half time the players, untired by their unceasing efforts, merely changed sides, and did not halt the game at all. In the second period of the game play was much more even, and again the C. C. forwards rushed the ball to their opposing goal, only to have their hopes dashed by the strong kicking backs of the P. C., Hall and Amaron.

Clark missed a good opportunity of scoring when he shot a penalty kick straight into Somerville's hands, and shortly after this the Congo forwards carried the ball down the field, and passed out to Knowles on the left wing. This player was uncovered, and with great deliberation proceeded to take aim and shot with such good effect that the ball curved up, then dropped gracefully beneath the bar, giving Harris no chance at all to reach it. The P. C. redoubled their efforts, and a few minutes later slammed the ball between the posts for the equalizing count. Both sides played hard in the remaining few moments of play, but were unable to tally.

An interesting feature of the combat was the presence of the Wesleyan eleven in the adjacent campus. These stalwart huskies were preparing themselves for their next game, which will take place soon with either the Congos or Presbyterians, and if the style which they displayed this morning is any criterion of their playing ability, they should give either of the above teams a good run for their money.

The teams lined up as follows:—

Presbyterians. Congregationalists.

Goal. Somerville

Harris. Backs.

Hall. Moore

Amaron. Thompson

Halves.

Moore. Bronson

Ginn. Whitmore

Woodhouse. Smith

Forwards.

McPhail. Davy

Clark. Knowles

Robb. Sanders

Lloyd. O. Craik

Cousens. G. Craik

THEOLOGS TO BATTLE ON CAMPUS TODAY

There will be a soccer game this afternoon at 2.30, against the Theologs on the Campus. The line-up is as follows, and all men are requested to be on the field ready to play at 2.30.

Goal—Easterbrook.

Backs—Gegg and Streadwick.

Half backs—Holland, Carlyle and Boslock.

Forwards—Stockhausen, J. Bickford, Seaton, McPherson and A. Bickford.

Subs—Charles, Plante and Airey.

WATER POLO TEAMS IN ACTION TUESDAY

A good work-out was held on Thursday evening by the water polo squad. Coach Verriot had the men go their hardest pace throughout the whole practice. The Seniors showed good form, each man being in the water and showing the reason why he was a senior.

Of the Intermediates, Jardine, Kyle and Vickerson were not in the water because of sickness, but it is fully expected they will be tossing the ball around again at to-day's practice. Good games are expected on Tuesday evening, and both McGill teams will fight hard, as a loss would affect their chances greatly.

Tickets will be on sale at the Union on Monday. The support of all students is asked in the matter of attendance at the game, and rooting for their team.

Though College days

Have their delights

They can't compare

With College nights.

FAST GAME OF INDOOR BASEBALL

Team of Arts '25 Defeated Science '26

Science '26 vs. Arts '25, last evening furnished a brand of indoor baseball that was worth while seeing. At first the Arts team showed the better play, and had their opponents on the short end of a 3-2 score. However, in the last of the third inning Science pulled together, and ran up four runs before Arts could turn back the required quota. In the fourth Science piled up five to Arts one run. This caused a change in battery for Arts, Bennett taking Bronson's place and Bronson moving back to Gardner's position.

With this battery Arts came from behind and piled up eight runs, while Science, in spite of their hard efforts, could only capture one run during the fifth and sixth innings.

In the seventh Arts added five runs to their score, while Science, although they put in a good spurt, they could only get one run.

Thus the game ended with Science on the small end of the score of 17-13. The line-up was as follows:—

Science. Arts.

Pitcher. Bronson

Catcher.

Knowlton. Gardner

Short Stop.

McClung. Miller

First Base.

Upton. Nairn

Second Base.

Fellows. Stewart

Third Base.

Bremner. Armstrong

Short Stop.

Monroe. Ellison

Right Field.

Costigan. Bennett

Left Field.

Rinfat. MacPhail

TO TRACE ORIGIN OF THE RED MAN

New Institution Seeks to Solve Mystery

Is the world on the verge of the solution of one of its greatest unsolved mysteries? It may be that the answer to it will be given within the walls of the Museum of the American Indian, Broadway and 155th street, New York, which on November 15th will be officially opened at a reception to which have been invited the President of the United States, the Cabinet, the Governors of the States, diplomats from sister nations and distinguished leaders in the arts and sciences.

The institution has among its prime objects the study of vast collections for the purpose of tracing the origin of the races which inhabited the Western Hemisphere. The museum is a vast building, the largest in the world, and it is expected that it will be one of the most important research centers of the future. The museum is a vast building, the largest in the world, and it is expected that it will be one of the most important research centers of the future.

Although centuries have elapsed since the discovery of America, said the director of the museum, Mr. George G. Heye, it is the opinion of the founder and director of the museum, Mr. George G. Heye, that the origin of the races which inhabited the Western Hemisphere is a mystery that has long puzzled the world.

There are notable collections of Indian objects in other museums in this country, but in this museum the origin and history of the American aborigines can be studied with the utmost thoroughness because every other factor has been eliminated.

Problem Presents Difficulties

"The problem is a most difficult one because of the wide differences in the culture and in the development of the races which originally inhabited the two Americas. We have the Aztecs, the Mayas and Incas, who had attained a degree of civilization comparable to that of the early Greeks, on one hand, while on the other we have nomadic tribes who knew little of the arts and were practically men of the stone age."

The tracing of the origin of these strange people is a project which should command the best endeavours of science. The people of the United States owe more to the American Indian than they realize, for indirectly, at least, he has had a marked influence upon our own culture.

"The collections which on November 16 will be on free public view, have been arranged primarily for the use of scholars, but nevertheless they will have a deep interest for every American. Aside from the educational purposes, they will also prove, we hope, of much value to artists, designers and manufacturers. As the resources of the museum are increased we think they will be of more and more service to the nation."

So impressed was Mr. Heye with the importance of a study of the origin and traditions of the American Indian that he changed his life work as a financier

to that of the directorship of the institution which he founded. The son of Gustave Heye, an official of the Standard Oil Company, George G. Heye was born in New York City in 1874.

On his graduation from the School of Mines, Columbia University, in 1896, he went to Kingman, Ariz., to take charge of the construction of a branch railroad. His attention was drawn to his present vocation through the purchase of a buckskin shirt from one of the Navajo laborers in the construction gang. In a few years his collection became so extensive that he had to rent two floors in a loft to accommodate them.

He sent expeditions at his own expense to all parts of the Western Hemisphere where the remains of the aborigines could be found. The museum of the American Indian, Heye Foundation, was incorporated in 1915. It occupies an impressive building erected through the generosity of Mr. Archer M. Huntington and other men of wealth and has been endowed by Mr. Heye. The founder is in every sense also the director, for with his own hands he has catalogued the 1,800,000 specimens which the institution contains.

THE VALUE OF THE LATIN LANGUAGE

The value of the Latin language as an important factor in humanistic education was the subject of an interesting article by W. H. Pool, in a recent issue of "The Lariat".

The Latin language was in very early times spoken only by the ancient Romans, but as the power of the Romans extended over the whole of the known world, the use of the language extended with it. At first it became the tongue of the whole of Italy, and finally that of the whole civilized world. In its uncorrupted form it continued in use for nearly a thousand years in most of the countries of modern Europe.

We are told that no language stands still, and that changes are constantly taking place in the forms, pronunciation, meaning, and use of the words used to express ideas. This is especially the case with Latin, for, though the written language has been preserved in a more or less pure form, the language itself has undergone great changes. These changes have been somewhat different in different parts of the world, say in Italy, in France and in Spain. The form which it took in Italy we call Italian, in France, French, and in Spain, Spanish. We speak of the English of King Alfred's time as Early English. In the same way it would be correct to speak of Latin as Early Italian and Early French and Early Spanish. Or we might say that the citizens of Italy, France, Spain and Portugal speak Modern Latin. The people of the countries named are not the only nations that speak Modern Latin. We do it ourselves. In fact, most of the words used to express the finer meanings of English are derived from the Latin, as those we get from the Anglo-Saxon are mostly the cruder, shorter words, including what we may call the "small change" of language. In fact, about two-thirds of the words in English dictionaries are Latin derivatives, and nearly one-half of the words we use in our daily speech are from the Latin. Nearly all the words used to express the finer distinctions of thought are of Latin derivation, and we thus see how important Latin is. To know Latin well is to understand English better, and a good knowledge of Latin is the best possible preparation for a good study of English.

ADVICE TO FRESHMEN.

Give thy thoughts no tongue,
Nor any unproportion'd thought his act.
Be thou familiar, but by no means vulgar;
The friends thou hast, and their adoption tried,
Grapple them to thy soul with hoops of steel;
But do not dull thy palm with entertainment
Of each new hatch'd, unfledg'd comrade.
Beware
Of entrance to a quarrel, but, being in,
Bear't that th' opposed may beware of thee.
Give every man thine ear, but few thy voice;
Take each man's censure, but reserve thy judgment.
Costly thy habit as thy purse can buy,
But not express'd in fancy; rich, not gaudy.
For the apparel oft proclaims the man.
Neither a borrower, nor a lender be;
For loan oft loses both itself and friend,
And borrowing dulls the edge of husbandry.
This above all: to thine own self be true,
And it must follow, as the night the day,
Thou canst not then be false to any man.
—William Shakespeare.

UNDERGRADS WILL HOLD THE DANSANT

Delta Sigma Society Elect Intercollegiate Debaters

HELD DECEMBER 2

Miss Lorna Kerr and Miss Joan Foster Elected

The meeting of the R.V.C. Undergraduate Society held yesterday was much better attended than the previous ones, thus showing that a better attendance at meetings is possible. The main business of the meeting was in connection with the "The Dansant" to be held on Saturday, Nov. 18, at R.V.C. The following tea committee was elected:—

Convenor—Miss E. M. Campbell.
4th Year—Miss A. L. Evans.
3rd Year—Miss G. Fielders.
2nd Year—Miss E. Hutcheson.
1st Year—Miss R. Dunton.

The price of the tickets is reduced from 75 cents to 50 cents, and these will be distributed on Monday. "Chub" Lebaron's Orchestra will be in attendance from four o'clock till six, so a good time is assured to everyone buying a ticket. Every girl is urged to give her whole-hearted support to make this tea a success.

Poppies are being sold at R.V.C. today, so the President, Miss Kerr, asked the students to do their best to buy their poppies at R.V.C. Each of the years will be represented by two girls from nine o'clock until one. Miss Kerr also reminded the students of the special convocation at R.V.C. that afternoon.

Miss Forster, President of the Delta Sigma Society, then took the chair. Miss Forster stated that arrangements had been made for an Inter-Collegiate Debate with Queens. This debate is to be held at the R.V.C. in Convocation Hall on Saturday, December 2nd, in the evening. Miss Forster spoke very strongly about the need of the support of the undergraduates, in this, the first women's intercollegiate debate. Saturday night and Friday night are the only possible dates for the debate, and as there is an informal dance at the Union on the Friday, it was the general feeling of the meeting that Saturday would be the most suitable. Everyone therefore, is asked to keep this night free, so that this important event may have the whole support of R.V.C. Miss Forster also expressed a hope that not only R.V.C. students would be present, but that the men also would turn out and show Queens what college spirit is to be found at McGill.

Nominations for the two debaters to represent McGill then took place. The following students were nominated:—

Miss Joan Foster,
Miss Lorna Kerr,
Miss E. M. Bayly.

The result of the voting showed that Miss Foster would have the honour of representing McGill.

MUSICAL SOCIETY TO BE FORMED AT R.V.C.

The attention of all R.V.C.ettes is called to the fact that a Musical Club is being formed to further the interests of good music in the University. A need is felt for a club of this kind, as so far there has been no musical society at R.V.C., although the men have had their "Musical Association" and "Students' Orchestra." These associations have proved popular among the men students, and it is felt that the girls should not be behind the men any longer in this respect.

The members of the club will study the Nothing definite has yet been decided, but at present it is thought that lives of different composers together with other topics of interest to be suggested by members of the society.

The first meeting will be held on Wednesday next, at one o'clock, in the Common Room, when the Constitution will be drawn up. All undergraduates interested in this club are cordially invited to be present; it is hoped that this first meeting will be well attended.

R.V.C. '26 APPOINT FOUR CLASS DEBATERS

Yesterday at one o'clock, a meeting of R.V.C. '26 was held. Miss Kerr, president of the Undergraduate Society, spoke to the class urging a fuller attendance at meetings than formerly. She emphasized the fact that the upper classmen always rely on the Freshmen to support the activities.

A committee of four was nominated from which two are to be chosen to represent the class in inter-class debating. Those appointed were F. Stocking, F. Secord, I. Hasely and G. Hart.

It was decided that the class photograph for the Annual would be taken at one o'clock next Thursday

He—I used to do a lot of hunting.
She—What all did you hunt.
He—I used to do a lot of hunting.
Sea?
She—Yes.
He—Well, I killed that.

CORRESPONDENCE

(Continued from Page Two)

paragraph of introduction, it is difficult to see just where any imputation was made that would in any way detract from the character of the course being given by Mr. H. R. De Silva; and yet that is the attitude taken by our correspondent. Mr. Tidmarsh's reference to a "psychological error somewhere" is a trifle strained, and a bit indefinite. He enquires, "Surely some editorial system can be devised which will prevent the errors of inexperience from marring the pages of our Daily"; any suggestion that might aid in the editing of the Daily would be welcome, and we are sure that from such a keen observer as Mr. Tidmarsh a proposal for the solution of the trouble alleged would receive earnest consideration.)

The Editor,
McGill Daily:

Sir,—The McGill Daily and other Montreal daily papers have published recently several pleas for the adoption of football as played in the United States. These articles are particularly pertinent at this time, and show conclusively that many persons interested in the greatest game of all are doing all they can to point out to the "powers that be" the advantages to be derived from a game played according to international rules.

For many years California and Lehigh-Stanford, the two great western universities, were exponents of the old-fashioned game, but to-day California, with a championship team, and Lehigh-Stanford, with Glenn Warner under contract for next year, are champions of the game that America has developed. Canada of 1922, in its position these Californian colleges were in before they made the change, and no doubt if the game as played over the line was adopted here, her experience would be similar to theirs.

Although the Canadian and American games are the same fundamentally, the forward pass, running interference and other features make the latter game not only a pleasure to watch, but also a pleasure to play.

If the officials in charge of rugby in Canada could have the opportunity to see two first class American college football teams in action this fall the Canadian game for the 1923 season would be the same as the American.

Yours for the improvement of the game.

S. W. HETHERINGTON,
Nov. 8, 1922.

To the President of the Students' Council:

Dear Sir,—On looking through a recent copy of the "Varsity," I read an account of a very excellent masquerade dance which was held at that college. This naturally brought to my mind the question of why could not a masquerade be held here in place of one of the informals. This is not a new subject; in other years and as late as last year this topic was discussed, and the reason for not holding one was that the programme of dances for the year was already drawn up.

Such a function would undoubtedly meet with success, and the approval of all the dancers in McGill, and would come as a delightful surprise and innovation if a masquerade could be arranged and added to the list of Union dances this year.

Trusting you will take some action in this subject at your next meeting,

A JUNIOR.

FRENCH SOCIETY HOLD 2nd. SEANCE

Interesting Charades Won by Second Year

The second meeting of the Société Française was held in the Common Room of the R.V.C. on Thursday afternoon. Mademoiselle Gouren and several French ladies, who had assisted at the French Summer School, were present, and were greatly entertained by the interesting charades presented by the first and second years.

The charade staged by the second year advanced class won the much-coveted prize. The word chosen by this group was "aussi-tôt," the leading part being played by Miss K. Perrin in a most interesting manner.

The first year advanced class played the word "aggrandi" very cleverly, and the second year elementary gave a good representation of the word "maison," but the judges, who were composed of the French ladies who were present as guests, found more points in favour of the first mentioned than the others, and the prize was awarded to second year.

After the charades, popular French songs were sung with much spirit under the able leadership of Mademoiselle Gouren. Tea was then served during which an animated French conversation was kept up throughout the room. This formed a pleasant finale to a very enjoyable seance.

The next meeting of the Société will probably be held in three weeks' time and it is hoped that an interesting "drama" will be the subject of this meeting's entertainment.

YOUNG SERBIAN'S FAMOUS CAREER

Prof. Pupin, Once Peasant, Now Famous Scientist

About forty years ago, a Serbian peasant boy landed in America, determined to try his fortune in a land that to him meant liberty and opportunity. He was penniless, yet had that invaluable possession known as ambition. Coupled with this quality was an insatiable desire for knowledge, a desire that could not be gratified in his native country.

Today, that boy is Prof. Michael Idvorsky Pupin, head of the Electro-Mechanics Department in the Engineering School. He is regarded as one of the greatest scientists of all time, and enjoys the distinction, along with such men as Watt, Volta, and MacCadam, of having his name spelled with a small letter.

Prof. Pupin's life is closely linked with that of Columbia. It was Columbia who gave him his opportunity, when as a boy of eighteen he applied for a scholarship. He has repaid his Alma Mater many times over during his years as one of its professors and honored sons.

The characteristics which later distinguished him in the scientific world were clearly in evidence when, as an undergraduate in Columbia College, he was just "Mike" Pupin, of the class of '83. He was just an ordinary Freshman, but his opportunity came during his Sophomore year.

In those days, class rivalry took the form of championship wrestling matches. Pupin, as the representative of the second year men, was pitted against a giant Italian. The College looked on him in wonder as "Mike the book worm" gave the giant his first defeat. From then on there was no question as to "Mike's" position on the Campus. In grateful appreciation he was made president of the Class of '83.

He was obliged to work his way through College, which he did as a tutor of Greek and wrestling. He was not only able to meet all his expenses, but at the end of four years he had saved enough money for a trip to Europe.

There he studied in the leading colleges, specializing in electro-mechanics. In 1885 he was called back to Columbia as Assistant Professor of Electro-Mechanics, and has been on the Columbia faculty ever since.

His laboratory, in the basement of Philosophy, is considered the most complete of its kind in the country. Here he has developed his remarkable inventions, and carried on the gospel of his science for so many years. If one may infer from his robust appearance and keen, inquisitive eye, he will continue to bring forth new revelations for many years to come.

Pupin enjoys the distinction of being the first man to use the X-Ray for surgical purposes in America. His experiments led to the perfection of the instrument, and after his successful demonstration of its practicability, it was used all over the country.

Perhaps his greatest contribution to science and to mankind was his famous "Pupin Coil", which has made long distance telephony and telegraphy a possibility. Another feature of this invention is the underground conduit system, which eliminated the necessity for telephone poles, and extended the principle of the ocean cable to the land.

In connection with this great invention, Prof. Pupin said, "When we moved to Morningside Heights, Columbia looked like an Acropolis—the buildings looked just like so many temples. But, there was an avenue, the Amsterdam Avenue, a thoroughfare for telephone trunk lines, a huge row of poles with an endless number of wires strung along, crossing our 'Acropolis.'"

"It was the ugliest structure I ever saw. I said to myself, Michael Pupin, with your sense of proportion developed under the guidance of the minstrels of Serbia, there is a jar here that you can not stand. That pole line of telephone wires must go; it must be buried under the ground. I studied and worked until I finally found a way to put that ugly structure under the ground. Then I let the American Telephone and Telegraph Company have it with the understanding that that ugly line of poles be taken down first of all. That, in my opinion, was one of the greatest services I rendered Columbia University and the City of New York."

"Tuning", one of the seven fundamental steps in the wireless or radio art, is credited to this "wizard of Morningside Heights". Two of the remaining steps were discovered and developed at Columbia. The experiments leading to the discoveries were carried on under the supervision and guidance of Pupin, and his pupil, E. H. Armstrong.

Ever since the Henley victory of 1874, which first attracted Pupin to Columbia, he has been a loyal supporter of the Blue and White. He has chrysalized that love for his Alma Mater through the great contributions to civilization which he has made in her name. He has amassed a fortune in his years of public service, yet he remains a teacher in the service of humanity.—Columbia Spectator.

Once upon a time there was a man who made a New Year's resolution to abstain from the use of over-vigorous language, and then the next night, to please his young son—who was crying for a drink, he got up in the dark and stepped barefooted on little Willie's tin horse. What a shame!

COACHING SYSTEM IN U.S. COLLEGES

Too Much Money Involved in Athletics

Commercialization of modern college athletics and the substitution of armies of coaches for the old-time initiative and spirit of the students themselves is analyzed and condemned by President Alexander Meiklejohn, of Amherst, in the current Atlantic Monthly.

His article on "What Are Colleges For?" cites as a not uncommon example a badly written letter of application from a man who wishes to enter Amherst solely on his athletic ability and is inquiring as to what pay he will receive for his services. From this example President Meiklejohn notes the change which has been undergone in the past few years, calling attention to the fact that many men are totally untouched by what a college ought to give, thinking of it first as an athletic club, not where games are

vices. Secondly, if at all, they acknowledge that college is an institution of learning.

The entire article is in protest against the spoiling of college athletics by using them for other purposes than merely that of sport. These other purposes are analyzed and suggestions are made as a remedy for these conditions. First of all, he suggests that admission charges for college contests should be limited to cover the actual cost of providing space and seats for spectators and that the income should be taken and used by the college and not by the team or its management. Secondly, he believes that the undergraduates should manage their own games, and finally, he urges an escape from the absurdity of the present commercialized armies of coaches.

In discussing the use of athletic teams as an advertising medium for the college he says: "It is believed that wherever the news of victory goes, 'boys' will be attracted to the college, their friends will be impressed by its strength, and so the numbers and the prestige of the institution will be increased. In the period of building up since the early nineties, this notion has been widespread and sometimes very powerful.

In criticism of the present coaching

AMERICAN THANKSGIVING

At a meeting of the American Club held in the Union last night, final arrangements were made for the annual banquet which is held on American Thanksgiving Day, November 30.

A vote was taken as to where the dinner would be held and the Queen's Hotel was decided upon, as satisfaction was given there in previous years. The executives were instructed to make arrangements for programs and entertainment apart from the speakers of the evening.

Excellent refreshments were served by the Union Cafeteria management after which the meeting officially ended.

system he states: "The absurdity of our present administration of games reaches its climax in the institution of the coach, the armies of coaches. These are men who are brought in to develop the playing skill of the team to the highest possible pitch. They are given full and complete charge of the players and the play; far more than anyone else they are held responsible for victories or defeats.

ADMIRAL SIMS IS MADE DOCTOR OF LAWS

(Continued from Page 1.)

As the conveyance passed, the students stamped behind until the leaders forced them into some semblance of order. Then they again sought St. Catherine Street. Throughout the route the citizens paid Admiral Sims and Sir Arthur Currie homage, applauding, doffing their hats or making known their friendly approbation in other ways.

The procession left St. Catherine St. at McGill College Avenue, proceeding towards the R.V.C., where the wildest scramble ensued on the part of the students for accommodation.

An Early Traveler

Said one little boy to another: "We have had such a bad time at home. Our new little kid went up to heaven." "We have had a worse time," replied the other. "We got one down from heaven."

"What a nuisance," said his little friend. "It must be the same little kid going about."—Judge.
